

`gg::GgMatrix::operator/`

```
graph LR; A[gg::GgMatrix::operator/] --> B[gg::GgMatrix::GgMatrix]; A --> C[gg::GgMatrix::loadInvert];
```

The diagram illustrates the resolution of the `operator/` method for the `gg::GgMatrix` class. A central grey box labeled `gg::GgMatrix::operator/` has two blue arrows pointing to two separate white boxes on the right. The top white box contains `gg::GgMatrix::GgMatrix` and the bottom white box contains `gg::GgMatrix::loadInvert`.
